

How to become a Secured Party Creditor, to take control over the legal entity of your name in capital letters.

Copyright your name- complete a form, sign, notarize, record at your County Court house

File your **UCC** (Uniform Commercial Code) **Financing Statement with Security Agreement** – listing your property; car, house, bank accounts, licenses for driving, marriage, etc. List all on forms, sign, notarize, record at UCC Office of the Sec. of State for your home state & the state where you now live (if different)

You should also take a copy of your recorded UCC form, and record it at your county courthouse.

When you have completed all Your forms & filing run a legal ad 3 times, 1 week apart, in your newspaper, listing what you did in brief, giving the UCC record number and the County book & page number. When it has run, get a certified copy of the ad from the paper, signed and notarized as a true copy.

Then you are done. Should any one use your name, sending you a letter, summons, bill, anything, you can warn them your name is copyrighted, and send to them outline copies of the information above, so they can check the public documents to see they will get fined \$100,000 or more to continue to use your name.

You need to know what this is about, do the reading & research, and you need to know how to defend yourself.

Do not do this ½ way. Just Know, when your full defense is in place, you do have legal standing to separate yourself from the attacks of other agencies and debtors.

This all works beyond the lawyers, courts and judges. It will stand their attacks too, if you do it right, know what you are doing, and take the proper action.

Not everyone will want to become a secured party, with the details, but anyone can learn this whole process, from many sources, including much information from our web sites.

www.ngofunding.co/Ucc_Research, look at articles/links to claiming your rights.

Please find these forms here.
www.ngofunding.co

There are more forms then I mention here. Some forms you just complete, and then keep safely at your own home. Bob Cross is excellent guide on how to do this.

We recommend the Redemption Manual 4.5 by American Bulletin, and CD And the many writings of David Robinson

The more you study and learn, the more energy and commitment you will have. For sure your CAPITAL NAME is used many places, but you can gain the upper hand and control who has access to you.
